## Prym fibrations as irreducible symplectic varieties

*Thursday, 16 June 2022 16:00 (1 hour)*

In this talk, I will first recall the construction of Lagrangian fibrations by Prym varieties starting from a K3 surface with a non-symplectic involution. Then I will discuss a criterion to ensure that the normalization of such a fibration is an irreducible symplectic variety. This is joint work in progress with E. Brakkee, A. Grossi, L. Pertusi, G. Saccà, and A. Viktorova.
